

Figure 1

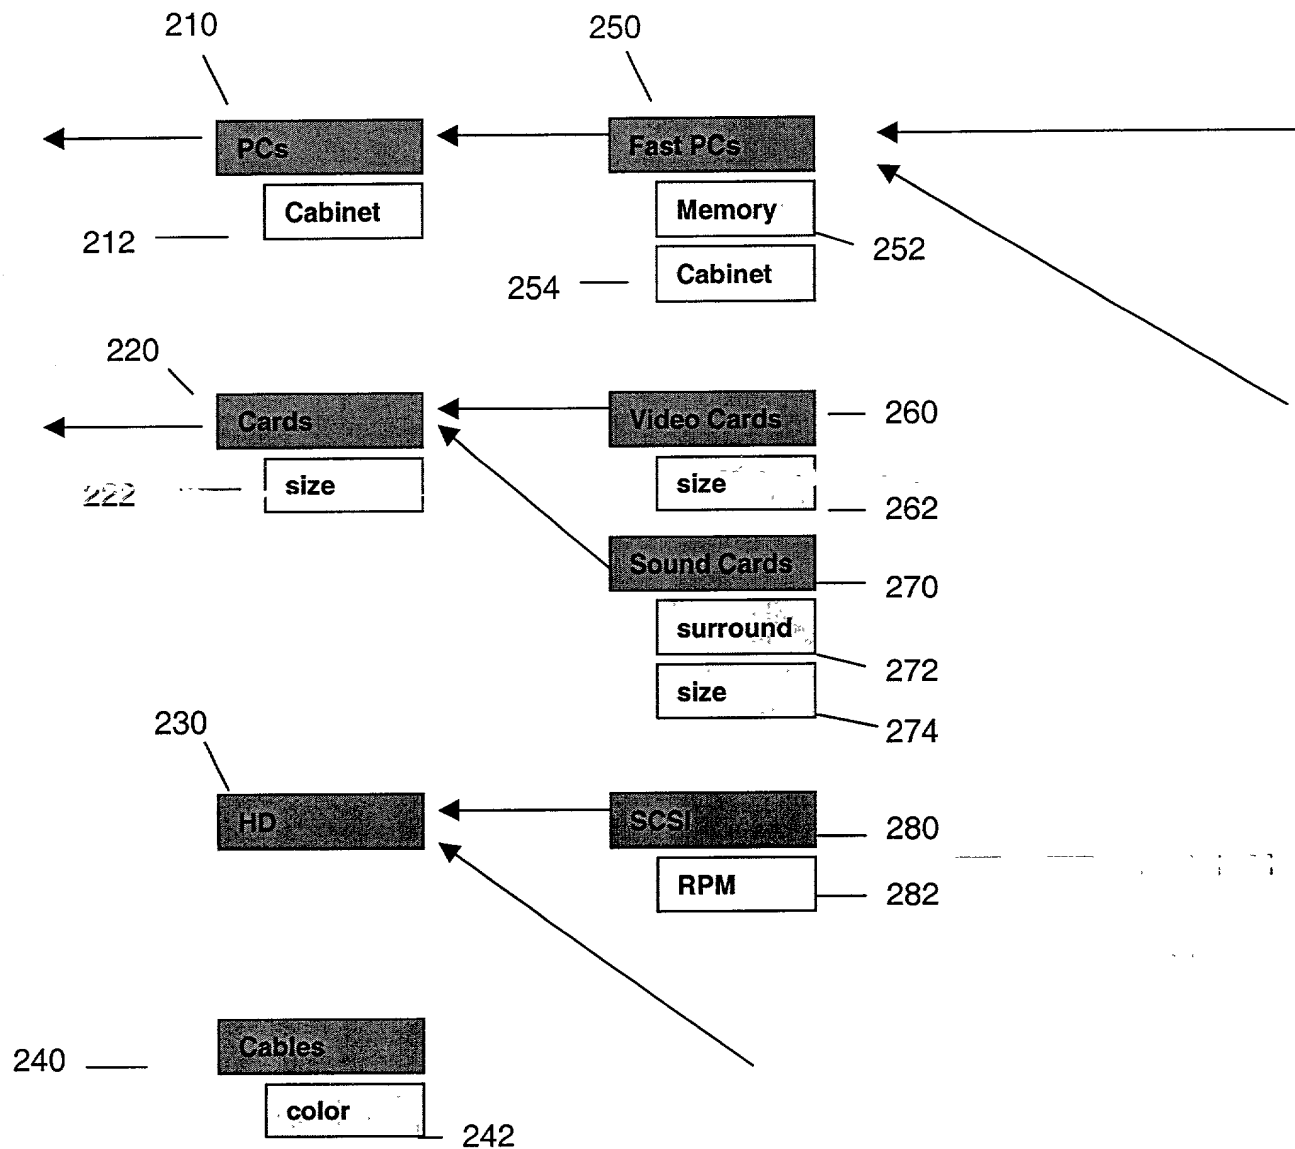

Figure 2

FIG. 3 is a block diagram of a system 300. The system 300 includes a user interface 305, a processor 310, a memory 315, a storage device 320, a network interface 325, and a power supply 330. The user interface 305 is connected to the processor 310. The processor 310 is connected to the memory 315. The memory 315 is connected to the storage device 320. The storage device 320 is connected to the network interface 325. The network interface 325 is connected to the power supply 330.

FIG. 3

Minimum Cardinality	Default Cardinality	Maximum Cardinality	System Adds Default Product?	User Pick Req'd?	Initial Solution	User Actions Allowed
=0	= Min Card	>Default Card	No	No	No items	Increase item quantities to Max Card
=0	> Min Card	=Default Card	No	No	N=Max Card	Decrease Item quantities to 0 but cannot increase them.
=0	> Min Card	>Default Card	No	No	N=Default Card	Increase item quantities to Max Card or decrease them to 0
>0	= Min Card	=Default Card	Yes	Yes	N=Min, Default, Max	Cannot increase or decrease item quantities.
>0	= Min Card	> Default Card	Yes	Yes	N=Min	Can increase item quantities to Max Card but cannot decrease them.
>0	> Min Card	= Default Card	Yes	Yes	N=Default	Can decrease item quantities to Min Card but cannot increase them.
>0	> Min Card	>Default Card	Yes	Yes	N=Default	Can decrease item quantities to Min Card or increase them to Max Card.

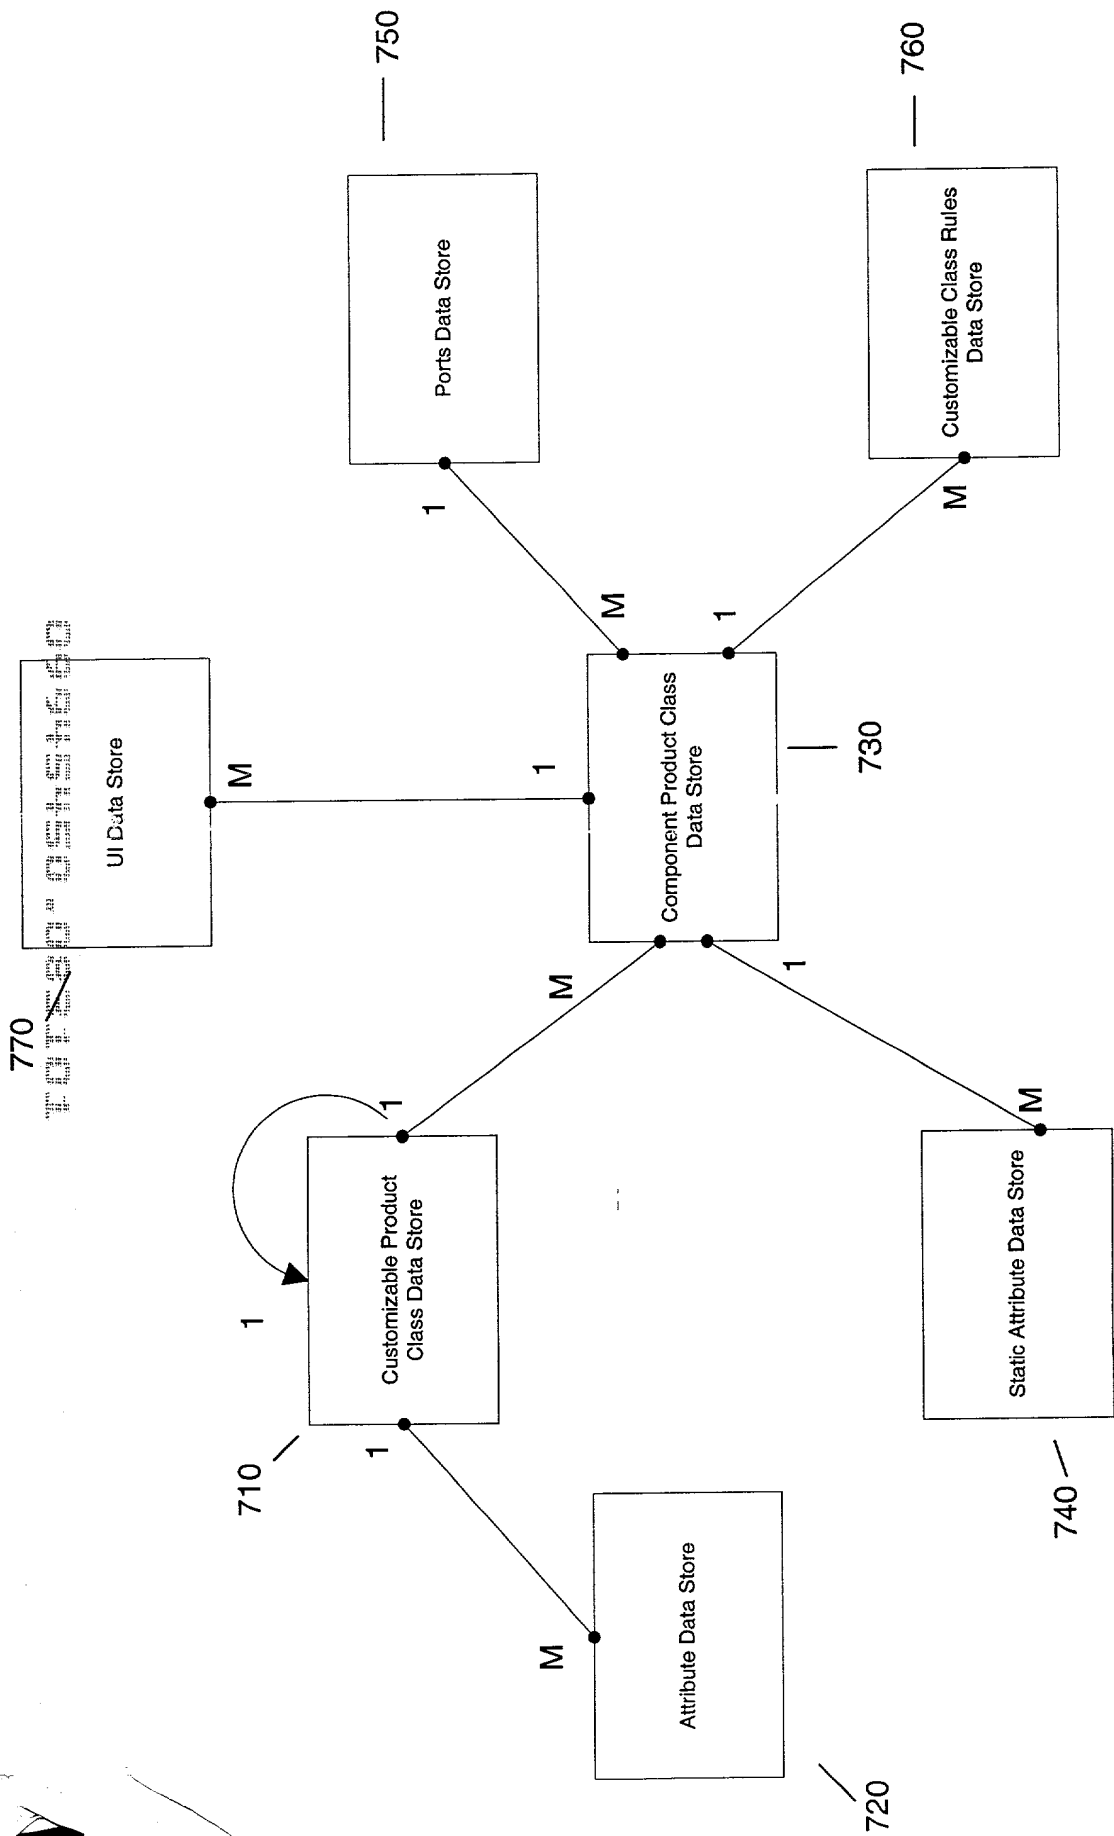

Figure 7

FIG. 8 is a block diagram of a system 800. The system 800 includes a customizable product addition logic 810, a customizable product assignment logic 820, a component product addition logic 830, a customizable rule addition logic 840, and a customizable UI mapping logic 850. The system 800 is configured to receive a request to add a new product to a system. The request includes a product name, a product description, and a product image. The system 800 is configured to process the request and add the new product to the system. The system 800 is configured to assign the new product to a specific category. The system 800 is configured to add a new rule to the system. The system 800 is configured to map the new rule to a specific UI element. The system 800 is configured to update the UI mapping logic 850.
